CS6233: Introduction to Operating Systems

Assignment 2

09-23-23

Kushagra Khatwani (kk5395)

Strace Log

PFA the strace log when the program is run successfully.

lab2_strace_log.log

```
execve("./lab2_1.o", ["./lab2_1.o"], 0x7ffe625d18f0 /brk(NULL) = 0x5555d4719000 arch_prctl(0x3001 /mmap(NULL, 8192, PROT_READ|PROT_WRITE, MAP_PRIVATE|MAP_ANONYMOUS, -1, 0) = 0x7fd82ee45000 access("/etc/ld.so.preload", R_OK) = -1 ENOENT (No such file or directory) openat (AT_FDCWD, "/etc/ld.so.cache", O_RDONLY|O_CLOEXEC) = 3 newfstatat(3, "", {st_mode=S_IFREG|0644, st_size=53475, ...}, AT_EMPTY_PATH) = 0

  +++ exited with 0 +++
```

Answers

Answer 1.

Functionality	System Calls
Opening a file	open_at() newfstatat()
	newfstatat()
Closing a file	close()
Reading a file	read()
writing a file	write()

Answer 2.

Functionality	System Calls
Opening a file	2
Closing a file	1
Reading a file	1
writing a file	1

Answer 3.

The value of file descriptor for read file in my program was 3. Yes, we can expect the value of read file to change, for instance if output file was opened first then the value of file descriptor would have been different (4 in my case).

Answer 3.

The value of file descriptor for read file in my program was **4**. Yes, we can expect the value of read file to change, for instance if output file was opened first then the value of file descriptor would have been different (3 in my case).
